

## England's badgers need you!

A cull of badgers is due to begin in two areas of England. The most robust research ever undertaken on badger culling does not support a badger cull to control the spread of bovineTB.

If the badger cull does go ahead as planned at least 70% of the badger population in large areas of the country will be killed, many of them healthy. We simply cannot let that happen.

Please sign the petition to Number 10 urging them to Stop the Cull!
